

Kat is part of our Prosthetics team and shows a keen interest in all aspects of dental technology.

She qualified from Leeds Dental Institute having being selected as student of the year twice during her academic career as well as winning the QJDT student award Kat has quickly fitted in as a valued member of the Beaver Dental Team. Kat has an obvious gift for creating natural aesthetic denture set-ups with true to life soft tissue reproduction utilizing the enigma colourtone stain system from Schottlander.

Kat is also a highly skilled Orthodontic Technician producing a many differing types of orthodontic appliances; this has enabled the lab to add to its product list so we can now provide our clients with a full range of bespoke dental appliances.

Kat also assists with implant case planning via her diagnostic set ups Kat also assists with other aspects of implant planning such as stents bite blocks and special trays. In addition Kat can be relied on to produce extremely good porcelain restorations at those busy times making her a very welcome addition to the team.

Kat Came to us 8 years ago as a student and joined the team proper on her graduation in 2007.
