

Lecture at Mandec - (Manchester Dental Education Centre)

20th July 2011

On July 20th Phil along with Craig Parker travelled to Manchester to give the keynote speech at the Manchester Dental Implant Foundation Course.

Phil gave a presentation on the communication required between lab and surgeon to ensure optimum implant results and went on to deliver a presentation on digital dentistry and how technological developments are revolutionising the dental industry with a focus on laboratory developments.

Fantastic feedback was received from organisers and delegates alike.
